

Plymouth Bike Nights

Thank you for the recent donation of £582.71 to the Chestnut Appeal from the Plymouth Bike Nights that took place on Thursday 18th April 2019.

The event was attended by over 500 bikers who raised the £582.71 through donation paid on arrival on Plymouth Hoe.

The Chestnut Appeal for Men's Health funds the very latest in treatments and technology that wouldn't be available without community fundraising. As well as Prostate Cancer, the charity also raise awareness of Testicular Cancer and Penile Cancer, two other quite treatable cancers that sadly if left can be devastating. The charity believes that it is vital to get more men talking about their health and taking action when they feel like something could be wrong. The Ultrasound-MRI Fusion is now in place at the Royal Cornwall Hospital and it will soon see the first patients benefitting from this state-of-the-art technology.

In 2019 the Chestnut Appeal is fundraising to put in place Research Nurses at Derriford and at the Royal Cornwall Hospital.

Over 47,000 men are diagnosed with Prostate Cancer every year. One in eight men will get prostate cancer in their lifetime. That is why here at The Chestnut Appeal we put awareness at the heart of everything we do. Men's Health suffers from an imbalance and it's the mission of the charity to highlight this most common cancer.

Kindest regards & thank you
David
